

**CORBAN** is a flexible, easy to configure and highly customizable alerting solution for T24 from nayamsoft. Any event across all the T24 modules can be captured and sent via SMS / Email.

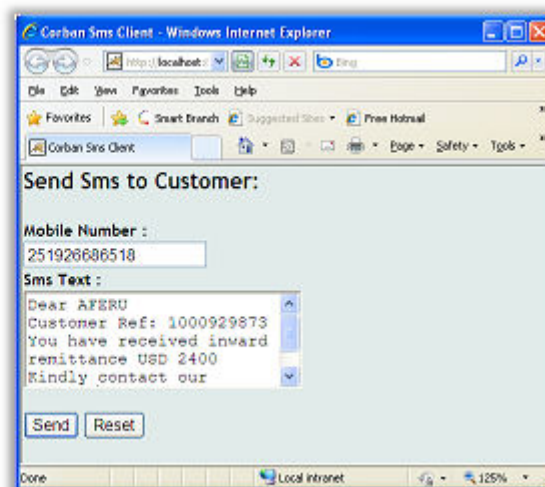

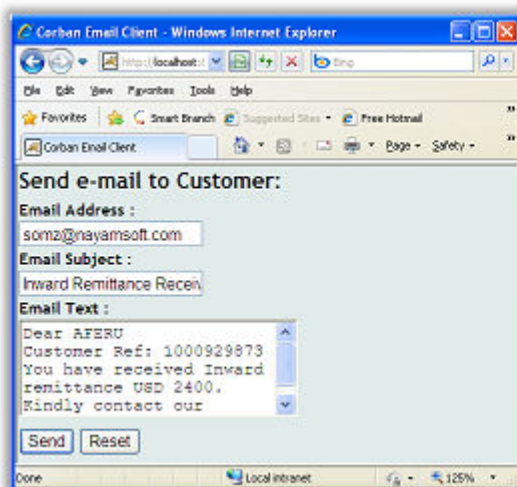

Unlimited Alerts			
Account Transaction Alert	Restricted A/c Activities Alert	Teller Cash Position Alert	ATM Account Balance Low Alert
ATM Non-Activity Alert	Cheque Payment Stop Alert	Customer Birthday /Anniversary Alert	Outward Remittance Confirmation Alert
LC Opening Alert	LC Expiry Alert	Drawings Settlement Alert	Fixed Deposit Maturity Alert
Pending TT transactions Alert	Logged In Users Alert	ATM Transaction Alert	Local Money Transfer Alert
LC Inward Collection Alert	Inward Collection Payment Alert	COB Alerts & Reports Alert	Salary Payment Alert & More...

**Automated Alerts**

All configured alerts will be captured and sent to the gateways via CORBAN processor service. Each alert can be configured to be sent to SMS / EMAIL channels and the message format can be customized using style sheets. Every alert will have its own style sheet defined per channel thus providing the flexibility of customizing the notification format.

**SMS Channel**

**Email Channel**

**User Initiated Alerts**

CORBAN has the unique functionality to send user initiated alerts directly from T24 screens. Users can contact customers from their T24 screens via SMS or EMAIL.

### NEST - Nayamsoft Exchange Services for T24

NEST is an enterprise email and sms messages gateway from Nayamsoft. CORBAN uses NEST gateway to send the alerts. It supports any system to integrate and send alerts. Any registered client (CORBAN itself a client to NEST) can be activated and use NEST gateway. It has feature to view the email/sms messages, delivered time stamps and time taken to deliver the messages. It also provides option to resend the failed messages again.
